

The *Alabama Journal of Mathematics* is published under the auspices of the Alabama Council of Teachers of Mathematics (ACTM) and the Alabama Association of College Teachers of Mathematics (AACTM).

The *Alabama Journal of Mathematics* is designed to meet a number of needs of the mathematics community in the State of Alabama. Specifically, the intent of the *Journal* is to knit together the various components of this mathematical community. It is not a mathematics "research journal," per se. The mathematical level of material submitted for publication should be such that the average interested and informed secondary teacher can understand most of what is presented. It is the policy of the Editorial Board to include a balanced and varied selection of topics so that every reader will find several items of interest in each issue.

Persons wishing to submit items for publication are invited to send their material to any member of the Editorial Board. These submissions may be made in hard copy (two copies in either WordPerfect, MS Word, Latex, Scientific Workplace, or pdf format) and/or electronically to [prossi@troy.edu](mailto:prossi@troy.edu). The members of the Editorial Board and the staff of the *Journal* are listed below.
